ABOUT THE BOAT

This model built for athletes with weights between 70 - 85 kg has the possibility of using Backriggers and Frontriggers.

We will also have this model available as a convertible, allowing for boat sweep and sculling usage.

Our design team developed a boat with a flatter hull, with main goal of keeping it sliding longer and higher, reducing the pitching movements in each stroke. This concept has its peak in the bow, which is inverted, thus decreasing drag with all the previous advantage.
